

Room Service (*food & drink*) & Housekeeping

Meals are served 3 times daily (8 am/1 pm/6 pm). You may choose up to 2 of those times to best match your home routine. As all our guestrooms & suites are private we can permit pets to free feed throughout the day if that is their usual routine and your preference.

In addition to their meals there are 3 daily “snack times” offered. With your permission we offer the guests snacks mid-morn, mid-aft and bed-time.

We recommend you provide your pets’ usual food for them to enjoy during their stay. This will decrease likelihood of any stomach upset. You are welcome to provide your own snack treats as well (no raw hide or pig ears please). We do recommend you bring “butcher bones” for dogs who like to chew and we have a fridge/freezer on site for proper storage. We provide stainless steel food dishes – you can bring your own if you wish but no glass or ceramic and only shatterproof plastic please.

Your Pet is welcome to enjoy our provisions if you prefer. We offer Kirkland brand adult maintenance kibble (Lamb & rice blend) for meals and dog biscuits (usually Milkbone brand) for snacks. There is no price difference to bring your own vs us to supply. We do request you provide us with written feeding instructions on your Guest Registration Form. Fridge and deep freeze are available on site for canned/raw diets and we really appreciate when you can provide us per meal rations in separate containers (baggies) where possible. Special diets are no problem so long as the instructions are clear.

Water buckets are provided in every room, cleaned daily and topped up regularly throughout the day. We have an on-site water distillation system which removes any and all minerals and odor from the country well water. It delivers beautiful crystal clear drinking water – better even than many bottled waters.

Bedtime snack & snug service is provided to every guest in our hotel. Luxury Suite guests and those opting for the additional amenity can get individual bed-time stories quietly read, accompanied by relaxing rubs sending the Pets off to sleep with a smile.

Housekeeping service is provided daily (or more often as needed) to keep our guests clean and comfy. Only pet friendly all natural disinfectants are used. Every guestroom is completely self-contained (waterproof) for zero opportunity for fluids to ever pass from one Guestroom to another.
